Subject: Smart Meter

Chairman Gary Pierce:

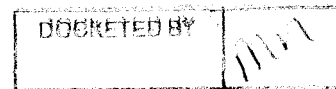

Thank you and the Commission for hearing my testimony at the hearing on "smart meters." I am happy to say that as a result of this positive opportunity, for the first time in over 50 years of writing letters and making phone calls on behalf of issues I believe to be important to freedom, health and privacy, I have received a positive response to my concerns and APS has informed us that the two "smart meters" on our properties will be replaced.

Thank You,
Kenneth E. Jordan

Arizona Corporation Commission

Dear Commissioners,

The metering issue is of great importance to me because I live with several chronic neurological conditions which are significantly worsened by exposure to wireless technologies, such as "smart-meters". Because of my medical conditions, I'd like to respectfully (but rather urgently) request that the Corporate Commission require APS to set up a permanent "opt-out" program which would allow customers like me to keep our existing analog meters.

Many of us with chronic illnesses already struggle to maintain

Many of us with chronic illnesses already struggle to maintain marginal levels of well-being and all of us wish to remain as functional and independent as possible. Please support us by allowing us to continue receiving our electric service! Thank you for your time.

Sincerely,
Carol Grohs

Subject: Meters

I urge you and the Commission to halt all smart-meter installation, except where knowingly requested by a consumer (per fact #22, CC order #69736), until such time as the utility companies prove conclusively that the ones installed already should not be removed. Then the commission should outlaw these meters entirely. The question should not be narrowed to medical opt-out; you are invading every home with spyware whose harvest of private information then is to be publically broadcast!

Subject: Smart Meter

My thanks to the Commission for letting me add my testimony to the discussion on smart meters and what if any charges should be added to an account if they opt-out. I didn't get to add my testimony with regards to charges, if any, for opting out of the smart meter program:

We were not given an option to "opt-in" in the first place
We were not informed of the pros and cons of smart meters or any information at all.
This was forced on us by APS at the direction of the Federal Government.
Apparently no extensive studies were performed in advance as to the health issues.
I'm sure no advance study was initiated by the Federal Government regarding the association with the United Nations Agenda 21 Program
No consideration was given with regard to the privacy issues

As a result, I believe we (the people) have no financial responsibility for the installation or the removal of these meters

Please protect the people.
Kenneth E. Jordan
